About Us

Our antiviral & antibacterial products provide the best protection against a wide range of microorganisms including viruses like COVID-19.

Our world-leading technology enables hospitals to balance time and cost against hygiene issues. Infection control is one of the most crucial aspects of the hospital environment and thus our products play a vital role in hospital infection control strategy. With Contamination and infection control being a priority for doctors, these products can become revolutionary to help our doctors & medical staff mitigate the hazards.

At Quark we genuinely care for our frontline workers and so do our products

-We use antiviral and antibacterial additives in masterbatch during the production of spun-bond non-woven fabrics. (Not surface treatment). Thus it serves long time efficiency
- Our fabrics are antiviral as per ISO 18184 and antibacterial as per AATCC-100 test reports. Up to 99% inactivation of microorganism within 5 minutes of contact
